

Japan Tobacco International (JTI) is large multinational tobacco company with operations in more than 120 countries and employing 27,000 people across the globe. More than 300 employees in Dagmersellen produce and market the well-known brands **Camel, Winston, Natural American Spirit** and **PloomTECH** for the Swiss market and for export markets. JTI is the fastest growing tobacco company in Switzerland. Team spirit, commitment and striving for quality are key factors that ensure the current and future success of JTI.

For our **Swiss Market and Factory organisation in Dagmersellen**, in the canton Lucerne, we are looking for a motivated, team-oriented and proactive individual (f/m) for the permanent position as

Business Decision Support & Compliance Analyst

In this role, reporting to the Entity Controller, you will contribute to the business decision making process, by providing investment efficiency evaluations. This includes sound financial analysis for various business scenarios and your involvement in the preparation of strategic business presentations for senior management approval. In addition, you will support the maintenance of the corporate compliance framework and act as power user/coordinator for corporate systems and processes.

Key Responsibilities

- Provide financial analysis and strategic simulation on financial matters and functional projects; prepare business cases for investment decisions
- Take strategic view on cost controlling, bring visibility to overall cost and key cost drivers and enhance investment evaluation process
- Ensure good quality business case descriptions for the approval process that involves the Company's top management
- Provide support to manage and maintain the JTI corporate compliance framework, while also executing controls to ensure the adherence to JTI processes, policies and controls
- Play a role in process and systems enhancement efforts
- Ensure maintenance and update of critical system master data, related to your area, as well as maintain appropriate control for segregation of duties in the systems.
- Support the Entity Controller and Entity Finance Manager in other activities and ad-hoc requests

Qualifications and Experience

You obtained a higher University degree in Finance, Economics, Business Administration, or equivalent. Preferable, you gained 1-2 years of practical experience in Finance, Marketing or Market Research analysis. We envisage a team player, who is creative and innovative thinker with excellent strategic analytical skills. You will enjoy working in a role that expects you to be independent, but also to cooperate cross functionally with other departments. Therefore, you possess a pro-active and flexible attitude, have good communication skills, and are an engaging team-player that builds relationships. You have advanced language skills of written and spoken English and German. Good knowledge of MS Office applications (focus on Excel) and an overall system understanding complete your profile.

We offer an open, multicultural and very dynamic environment with personal development opportunities, very attractive employment conditions and team activities.

If you are interested to further develop your career and to join a highly professional team with a winning spirit – then we should meet. Please send your application in English language with photo.
