

Varian Medical Systems Inc. is the world's largest manufacturer of medical devices and software for treating cancer and other medical conditions with radiotherapy, radiosurgery, proton therapy and brachytherapy and employs more than 6'000 people.

To complete our team in Baden, CH, we are looking for an

## Software Engineer

At our R&D site in Baden with more than 200 employees we specialize in the development of imaging software and hardware as well as treatment management systems for radiation therapy cancer treatment. Bring your talent to a place where your work will help fight cancer. Join Varian's Oncology Systems team, and the work you do can make a difference by helping to create a world without fear of cancer. We develop and manufacture products and solutions that innovate, support and streamline cancer-fighting solutions worldwide.

We are looking for talented software developers to join this endeavor, and become a member of our international software engineering team.

### Main Responsibilities:

- Software engineering activities from analysis, design and planning through implementation, documentation and testing to maintenance
- Collaboration with application developers and system engineers on-site and also world-wide
- Compliance with the company's quality assurance procedures and policies
- Build-up of deep understanding of the radiation therapy domain, the workflow and the applications

### Qualifications and Experience:

- Software Development Engineer (FH/Uni/ETH)
- Advanced experience in software engineering using C#/.NET (min. 3-5 years)
- Knowledge and interest in modern software development methods, e.g. TDD, CI, etc.
- Excellent social and communication skills
- Fluency in written and spoken English

You are a self-starter, able to work individually as well as in a team. You master complex systems with your analytical skills and quick perception. You cope in a multi-lingual environment and have strong interpersonal skills. Your deliverables perform well and are of high quality. You bring your skill to the next level with both internal and external training.

You're just one click away from the most impactful work you'll ever do. Apply now and join our team. Job Code 11865BR. [APPLY HERE](#)

We look forward to receiving your application and CV.
