Freestar Informatik

Freestar-Informatik AG has been serving companies in the Swiss market since 1998 with a multisided IT service portfolio. For exciting IT-Projects, we are constantly looking for temporary IT specialists and executives. Do you prefer a permanent role? We still are the right partner because we also provide IT specialists in this case. In either event, we place importance to ensure an optimal match between candidates, customers and roles.

Software Architect Professional to Senior Level (m/w) 80-100% [Ref :1115]

Your Tasks

- Breakdown & technical conception of functional and non-functional requirements
- Preparation of prototypes and proof of concepts
- Definition & implementation of architectural principles and roadmaps
- Creation of technical concepts, specifications and code templates
- Assistance on the Engineering and implementation of IT-Systems
- Cooperation on the construction of container infrastructure

Your Profile

- Higher education degree in Computer Science, Information Systems or related field
- Several years of experience as a software engineer and ideally as a software architect in an agile environment
- Experienced in product development based on Java EE, Spring and Angular
- Experienced in the integration of peripheral systems via REST and JMS
- Highly motivated and willing to develop personally and methodically
- Fluent in German (Schwizerdütsch verstah) 😊 and English

Your Benefits

- Get the chance to revolutionize a sector, which is blocked in an old school mindset
- Get an attractive remuneration package including strong social benefits
- Get a stable permanent position in a company within the Zürich area and with a solid client porfolio

Ready to Rumble?

I am looking forward to receiving your CV per e-mail.
