#### Our offer

- In this role, you create and maintain Risk Management Files, collect input from R&D and Clinical and provide input to Design Requirements.
- You organize and moderate interdepartmental meetings to gain information regarding Risk Estimation and Risk Control.
- You are responsible for compliance to procedures, phrasing and harmonization and prepare documentation for the risk management board.
- You interface with SGS partners regarding their documentation and control of Manufacturing Process Risk for T&E products, as well as with Post-Market Surveillance and Clinical Affairs for routine updates of each Risk Management File, and supporting the creation of PMHRAs when thresholds are exceeded.

#### Your profile

- You hold a Bachelor/Master Degree in Medical Device Technology, Mechanics or similar.
- Ideally, you have 3+ years of work experience with a strong understanding of functional areas, or an equivalent combination of education & work experience in the medical industry.
- You have the knowledge of ISO 13485, ISO 14971 and QSR requirements.
- You value an international working environment where you can use your excellent command of English. Good knowledge of German is an advantage.

We are looking forward to your online application via our career page, reference number 21755BR.
