33.000+ employees

5.638 patents owned globally

$ 11.3 Billion turnover

Various perspectives and possibilities for personal development

Flexible working hour arrangements

Unique and engaged colleagues

Our offer

- In this role, you will be planning and leading internal audits and organizing third-party audits.
- As the process owner of audit procedures, you will train auditees to prepare for audits.
- You are also the process owner of supplier management procedures and you will monitor the outsourced processes.
- Additionally, you will be responsible for establishing and maintaining quality agreements and maintaining the quality manual.
- As part of the quality team, you will coordinate quality improvement projects (quality plan) and managing your own QMS improvement projects as assigned.

Your profile

- You have a university / university of applied science degree in science or engineering.
- You have at least 2 years of experience in Quality Assurance of safety related products, preferable in the medical device industry.
- Moreover, you have knowledge of MDD, ISO 13485, ISO 14971, and QSR requirements.
- You have very good English skills, ideally have gained experience in project management and are familiar with the typical MS Office applications.
- Your team orientation, strong communication skills and your assertiveness along with a high quality awareness and an independent work style complete your profile.
