33.000+ employees

6.560 patents owned globally

\$ 12.4 Billion turnover

Various perspectives and possibilities for personal development

Flexible working hour arrangements

Unique and engaged colleagues

Our offer

As an interface between quality, development and process design you accompany the development of medical implants and instruments by ensuring the accurateness of the applicable quality-related structures and regulations.

- In close cooperation with the process owners for design control, who are located across sites, you ensure that all processes meet the international requirements and all necessary approval methods along with all documentation standards are established.
- You analyze and supervise the compliance of procedures by verifying development records, design transfer protocols, validation reports and risk analyses and initiate corrective actions as necessary.
- The introduction and monitoring of quality key data across sites regarding design control and risk management are part of your area of responsibility as well as independent creation and processing of reports and evaluations in order to encourage and support continuous improvement activities.

Your profile

- You are an engineer in the field of mechanical engineering, mechatronics, medical technology, chemistry, biotechnology or have a degree in an equivalent subject of study.
- You know the medical devices norm ISO 13485 very well and have at least 4 years of experience in quality management, ideally in the medical device industry.
- Moreover, you are familiar with MDR and have knowledge of measurement technology and manufacturing engineering.
- You have very good English skills, have had experience in Design and or quality process and are familiar with the typical MS Office applications.
- Your team orientation, strong communication skills and your assertiveness along with a high-quality awareness and an independent work style complete your profile.

We are looking forward to your online application via our career page, reference number 31393BR.
