

To strengthen our team at the Swiss location Neuhausen am Rheinfall / Schaffhausen, we are looking for a motivated and competent

## Automation Quality/ Test Engineer

We are looking for a Software Quality / Test Automation Engineer to join our expanding software organization. You will work with internal and external groups to define the test scope for the required testing. You will create and manage the test plan, test cases, test setups, run tests when required, analyze and present data, and work with development engineers on root cause analysis on failures.

### Your Duties

- Write test planning documentation from requirements specifications.
- Design and develop automated tests using Robot framework, Selenium, Python and Oracle PL/Sql Script
- Script and execute automated functional, integration, system and regression tests.
- Maintain and enhance the test automation framework.
- Participate on Agile Scrum teams to review acceptance criteria, provide test estimates and execute tests.
- Write requirements and create scenarios for performance testing
- Interfacing with the customers during the acceptance Test
- Production Deployment and 3rd Level Support
- Data analysis, report writing, and presentation.
- Investigate and capture issues using JIRA, iET

### Your Profile

- 5+ Years of total testing experience including Test Design and Test Execution
- 5+ Years of experience in Oracle (SQL/PLSQL)
- 2+ years of Test Automation experience using Robot Framework, Selenium, UFT etc.
- 2+ years of Test management and Test planning experience
- Experience in data analysis using any BI tool like Microstrategy/ QlikView/ Tableau and presentation.
- Bachelor in Engineering
- ISTQB Certified
- Very Good Communication Skills in English and German
- Good Documentation Skill

### We offer you

An interesting job in an international environment. You will work on software solutions which improve the daily lives of passengers commuting with the public transport.

### Your application

Do you feel that this might be the next steppingstone in your career? If you possess the above skills and attributes and are interested in this challenge, then please send your application to [jobs@trapezgroup.com](mailto:jobs@trapezgroup.com). For further information you can contact Jessica Jasarevic, Junior HR Manager, Trapeze Switzerland GmbH, phone +41 58 911 11 73.

The business of transportation is complex. There are new trends and emerging challenges every day. We make it our business to deliver the best in technology, systems and services to our customers who have the need to automate the multitude of tasks that come with supporting, building, managing and measuring transportation services in large metropolitan environments. The demands of addressing climate change lead to an increasing need to provide better and more efficient public transport operations. Our systems are used by world cities like London, Atlanta, Zürich, Hamburg and hundreds of government and commercial organizations across Europe, North America, Africa and Asia Pacific. The company runs offices in Canada, USA, Switzerland, Poland and several other countries.
