

IT System Administrator/Engineer (m/f/d)

100%, Festanstellung

Would you like to contribute to transforming one of Switzerland's most traditional industrial companies into a young, dynamic team with flat hierarchies? If you are a highly motivated person with energy and passion who enjoys carrying out and coordinating a wide variety of projects in a targeted, international and cross-divisional environment, then this position is ideal for you and also an excellent starting point for your further professional development. In order to strengthen our IT team, we are looking for an IT System Administrator/Engineer at our main datacenter location in Breitenbach (SO).

Your Responsibilities

- Worldwide administration and troubleshooting of our Cisco-based LAN/WAN/WLANNOIP environment
- Administering our VMware, SAN, Windows Server and Active Directory infrastructure
- Administering the IT security infrastructure: firewall, VPN, Web filtering
- Maintaining and improving systems availability and continuity
- Participating in international projects/migration/rollouts

Personal Profile

- Bachelor's degree or an equivalent IT degree
- Cisco and/or Microsoft Environment certification
- At least 3 years' experience in data networking and server administration
- Experience in Citrix, VMware, and Windows servers and ITIL is an advantage
- Knowledge of Exchange/SharePoint is an additional advantage
- Fluent German and excellent command of English
- Highly motivated, team oriented, and energetic
- Strong communication and documentation skills

We offer an exciting job in an international environment with lots of development potential and the necessary space to shape it. Does this job sound like a match for your skills and motivation? Then don't hesitate to contact us.

Take the first step – we look forward to hearing from you!
