**We are passionate about developing quality hearing systems. Join our team!**

In our Global Software Team we develop Fitting Software Solutions, used by hearing care professionals for the individual fitting of hearing instruments.

To strengthen our team in Berne, we are looking for an

## **AUDIOLOGIST (M/F)**

**In Software Development**

### **Your Responsibilities**

In this position you design the user interaction for professional hearing instrument fittings and you contribute to new functionality in our fitting software. You write user and system requirements for our fitting software platform and applications. There is a close cooperation with product managers and audiologists in the development teams to define the handling of hearing instrument features in the fitting software. For implementation and testing, you give support to the software engineers and testers in the team.

### **Your profile**

- You are a hearing care professional (e.g. eidg. Hörgeräteakustiker) or an audiologist with dispensing background, or with background in the hearing industry
- You have good analytical skills
- You will be working in an international, multi-site team, so excellent communication and presentation skills in English are required
- You have good writing skills in English

Do you like to use your professional knowledge and experience to help people with a hearing loss through product improvements and innovations? Then please send your application by e-mail to [jobs@bernafon.ch](mailto:jobs@bernafon.ch). For further information on our products and services, please visit our website ([www.bernafon.com](http://www.bernafon.com)).
