Accelerate your Career

Selectron Systems AG is a global specialist in the field of automation solutions for rail vehicles: Train Control & Monitoring System TCMS (I&C and communication). We offer hardware and software components that enable efficient solutions for TCMS and have achieved an average growth of 15% in the last 10 years. Since the beginning of 2015, we belong to Knorr-Bremse Group and thus increase our marketability, expand our range, and widen our areas of development.

We are currently hiring a

Software Engineer .NET/C#   (m/f)

for the development and maintenance of our innovative PC desktop tools and web applications for the train market using Microsoft .NET/C# technologies, agile frameworks and methodologies.

ESSENTIAL TECHNICAL SKILLS

- Profound development experience with .NET/C#; background in C++ considered an asset

- Profound test experience (unit tests, system tests, regression tests)

- Good working experience with technical best practices (e.g. XP, SOLID), methodologies (e.g. Agile, TDD) and tools (version control, build server)

- Experience in Secure Coding best practices

YOUR PROFILE

- Bachelor or master's degree or equivalent in a software discipline

- Several years of professional experience in software development

- Committed and self-motivated team player, pragmatic problem solver with high quality standards

- Fluency in German or English, good technical knowledge in English

- CSSLP certification is a plus

YOUR BENEFITS

Work in a successful, technically demanding and dynamic international environment. Be part of a highly motivated and versatile team of creative and solution-oriented professionals. Benefit from an ideal opportunity for your own personal and professional development

We look forward to hearing from you
