PRODUCT OWNER MOBILE APPS

Start date: ASAP
Location: Lucerne, Switzerland
Remuneration: Competitive

About the Company

Axon VIBE is a location-based contextual mobile app and technology platform that detects and predicts human behavior, and anticipates user needs. We power the next-generation mobility solutions. Think of a travel app that already knows where you want to travel, that warns you about disruptions before you leave your house, and that seamlessly guides you along your journey.

Axon VIBE was founded in 2014 by location technology veterans (Google Maps, Bing Maps, Endoxon, Multimap) and now comprises over 100 employees. We are headquartered in a castle, overlooking the Alps, in the picturesque city of Lucerne, Switzerland. We also have offices in the United Kingdom, Hong Kong, New York City and Da Nang.

We operate as a start-up and we have exciting growth plans. Already we work with some exciting customers around the world, including SBB in Switzerland.

About the Role

We are looking for an experienced Product Owner to drive our mobile solutions that enable our partners to engage with their mobile app users. Using creative and pragmatic methods, we want you to contribute to the product roadmap and lead your teams to deliver on the product strategy.

You will be working with two SCRUM teams in Da Nang, Vietnam. Hence, experience of working with distributed teams in Asia is welcomed. We are looking for a colleague driven to deliver outstanding and disruptive products based on requirements identified together with the businesses.

We offer you these challenging tasks in an innovative yet game-changing environment with distributed teams in Lucerne, London, Norwich, New York and Da Nang. We use JIRA, Slack, Zoom, and try not to use email. We are constantly refactoring, improving and open to new tech, new approaches and processes.

Your Profile

- o   Bachelor or Master Degree (ideally in engineering, IT or business)
- o   Proven experience in agile mobile app development
- o   Hands-on and willing to get your hands dirty (you might find yourself sitting in a train testing your own mobile app, digging deep in a SQL database or playing with a REST API)
- o   Problem-solving and decision-making attitude
- o   Willingness to travel to Da Nang (Vietnam) 3-4 times a year (1-2 weeks)
- o   Experience in coordinating developers and task in different locations
- o   Very good oral and written communication skills in German and English

Bring your great attitude, interest in the latest technology along with your Product Owner skills in creating, slicing and dicing product backlogs, epics, retrospectives, reporting, facilitating, negotiating, brainstorming, data analytics, data visualization, user experience, and communication, and let's see what we can achieve together.

We are looking forward to receiving your application on hr@axonactive.ch. If you have any questions, feel free to contact Manuela Unger, our Head of Human Resources, at +41 41 249 25 96.
