

Heptagon Advanced Micro Optics (now ams AG, Optical Sensor Solutions Division) provides industry leadership in sensing technology (proximity, time of flight, illumination, flash, structured light and imaging) that results from a unique combination of wafer-level integration, pragmatic innovation, total supply chain control, a culture of integrity, and a 20+ year track record of delivering breakthrough technologies to leading OEMs.

Heptagon's research and development teams are located in Zurich (Rüschlikon), Switzerland; development and manufacturing are in Singapore, Shenzhen, China, Taiwan & Malaysia; and business development and sales offices are located in Santa Clara, CA.

We are in the process of expanding our Time-of-Flight sensors development team located in Zurich (Rüschlikon), Switzerland and looking for qualified candidates for a

Project Manager Optoelectronics Product Development (m/f)

Your role

This position provides leadership to one or more cross-functional project teams to develop new products according to specification, timeline and budget.

The main responsibilities will be:

- Directly responsible for the overall success of new product development projects from product definition until mass production ramp up;
- In charge of all internal cross-department liaising: different engineering teams (IC design, packaging, optics, testing, SW/FW), production, qualification;
- To produce project monitoring and evaluation documentation; to prepare and conduct presentations (company internal and for customers); organize project steering meetings and ensure that minutes will be taken, action items defined and actions executed;
- Negotiate and resolve issues as they arise across areas of the project and where they impact on other activities, systems and projects;
- Regular travelling will be required for this position

Your profile

The ideal candidate will have:

- Bachelor degree or higher in Optical/Electrical Engineering or other relevant engineering field
- Minimum 3 years of experience in the following:
 - working in a new product development environment with cross-functional teams across multiple time zones
 - developing products for high volume production
 - preferably a background in consumer electronics and/or semiconductor industry
 - proven project leadership experience to bring product from concept to production on time and within budget
- PMP certification
- A broad business and technical aptitude
- Good communication and presentation skills in English
- Excellent interpersonal communication, finds creative ways for getting things done

What we offer

- International, fast pace job in a rapidly growing environment
- Heptagon is a multinational company with locations in Singapore, Switzerland, USA, China, Taiwan & Malaysia with approximately 2'400 employees worldwide and growing
- Focused towards micro opto-electronic modules for imaging, light and sensing products for, but not limited to, smartphones, tablets, smart TV, laptop and gaming
- Interaction with high profile, well-known companies in the space of consumer electronics
- Attractive and competitive benefits
- Young and hungry team, startup mentality, hands on
- Reporting to Global Program Manager

If you are interested in an international, easy-going and flexibly environment, please send your CV to hptg_careers@ams.com.
