

Groundbreaking virtual advertising solutions

uniqFEED, a spin-off company of ETH Zurich, Switzerland is a computer vision specialist based in Zurich. We offer highly innovative, groundbreaking and entirely software-based solutions which virtually overlay existing perimeter board advertisements in sports stadiums with other content of choice for live television broadcast. For our headquarters in Zurich, we are currently seeking a

Lead QT/C++ Software Engineer (80-100%)

Your duties / core responsibilities

- Form and lead a new team of QT/C++ software engineers.
- Drive uniqFEED's UI/UX ecosystem, which is used by our Operators during our live cases:
 - collaborate with the operators for feedback on UI/UX improvements.
 - perform ticket and bug triage and decide what feature is needed by when.
 - further improve current UI/UX environment towards the goal of having an easy to use and reliable end-to-end system.
- Operator UI training upon new software releases.
- Work on new UI/UX concepts for future products.

Your benefits

- A dynamic, fast-growing environment with many possibilities for further development.
- A highly motivated, interdisciplinary, multi-cultural team with focus and vision.
- A competitive salary.
- Flexible working hours in an appealing work environment in our new HQ in Glattbrugg, Zurich

Your profile

- B.Sc. / M.Sc. in computer science, electrical engineering, or related field.
- Proficient in C++ (5 years) and good software development skills.
- Experience in programming with Qt / QML (3 years).
- Experience in leading a team of software engineers is a plus.
- Experience in maintaining and refactoring large software products is a plus.
- Knowledge of modern software development processes including agile methodologies, testing, and continuous integration.
- Good problem solving and communication skills.

Your application

Please send your detailed CV and a concise motivation letter/email to: jobs@uniqfeed.com.

Swiss or EU work permit is mandatory.
