In order to expand our dynamic team of developers, we are searching for people to fill the following position immediately, or upon arrangement:

Mobile Software Engineer (m/f) 80-100%

at our branch office in Roveredo (GR).

Your role:

- to develop high-security DSwiss applications – from analysis to specification and implementation, following the process all the way to the automated integration test
- to collaborate with the DSwiss mobile team (Basis: C#, Xamarin), the primary client application of our solution, used by hundred of thousands of people worldwide
- to implement new software components
- to analyse problems and elaborate solutions independently or as part of a team
- to employ the latest development methods (based on Scrum) as part of an innovative and highly productive team
- work on customer projects in the areas of analysis, architecture and implementation
- closely collaborate with stakeholders and project managers
- you will also take on tasks in areas outside your field of specialisation for the purposes of business

Your profile:

- a degree from a technical institute of higher education (ETH [Swiss Federal Institutes of Technology], a university or 'Fachhochschule' [university of applied sciences])
- experience in mobile development
- preferred: experience with Xamarin and C#
- you should be an all-rounder and not tied to using one specific programming language
- a background in information security would be a huge plus
- the ability to think outside the box and analyse complex problems
- an entrepreneurial way of thinking and doing business, as well as the ability to deal with stress
- good written and oral communication skills in English

What we offer:

- You can expect a professional, dynamic environment in a Swiss company in a large growth phase
- Challenging development tasks with different components and using various technologies
- A comfortable working environment in terms of both layout and colleagues
- You have the opportunity to actively contribute your own ideas
- Regular team events (e.g. hackathon)
- Attractive employment conditions

Who are we?

DSwiss AG is one of the world's leading providers of highly secure digital services for financial service providers. In addition to customized business solutions, DSwiss is also responsible for the development of the award-winning SecureSafe online data storage system. Around one million users worldwide use this service to store their files and passwords

Based on our modular, scalable and highly secure Internet data safe platform, we now enable banks to provide their end customers with the DSwiss Internet data safe as an extension of online banking and thus offer the digital continuation of the classic bank safe deposit box. In addition, companies from all industries can use the data safe to exchange documents with their customers securely and confidentially.

The DSwiss applications are in a constant state of flux and have to face new challenges. Besides continued software development, we are also striving for ongoing technical modernization.

Contact:

If you are interested in applying for this position, please contact us and send us your informative and full application documents by e-mail. We are looking forward to meeting you personally soon.
