

In order to expand our dynamic team of developers, we are looking for people to fill the following position immediately, or upon arrangement:

C++ / Qt Software Engineer 80-100%

at our branch office in Roveredo or our headquarters in Zürich

Your role:

- Lead Developer of the DSwiss Sync-Client
- to develop the high-security Sync-Client – from analysis to specification and implementation, following the process all the way to the automated integration test
- to closely collaborate with stakeholders, project managers and customers
- to collaborate with the other DSwiss development teams
- to analyse problems and elaborate solutions independently
- to employ the latest development methods (based on Scrum) as part of an innovative and highly productive team
- to work on customer projects in the areas of design, implementation and integration
- to participate in 3rd level support
- you will also take on tasks in areas outside your field of specialisation for the purposes of business

Your profile:

- A degree from a technical institute of higher education (ETH [Swiss Federal Institutes of Technology], a university or 'Fachhochschule' [university of applied sciences])
- A minimum of 3 years' experience in C++/Qt development
- Knowledge of file-system fundamentals
- Good communication and organisational skills
- A high degree of independence
- Knowledge of C# and Xamarin is a plus
- Potential to take over a future team lead role
- A background in information security is a plus
- Good written and oral communication skills in English and German (in Zürich) or Italian (in Roveredo)

What we offer:

- You can expect a professional and dynamic environment within a Swiss company
- Highly competitive salaries
- Challenging development tasks with various components and using different technologies
- A comfortable working environment in terms of both layout and colleagues
- You have the opportunity to actively contribute your own ideas
- Regular team events (e.g. hackathon)
- Attractive employment conditions

Who are we?

DSwiss AG is one of the world's leading providers of highly secure digital services for financial service providers. In addition to customized business solutions, DSwiss is also responsible for the development of the award-winning SecureSafe online data storage system. Around one million users worldwide use this service to store their files and passwords

Based on our modular, scalable and highly secure Internet data safe platform, we now enable banks to provide their end customers with the DSwiss Internet data safe as an extension of online banking and thus offer the digital continuation of the classic bank safe deposit box. In addition, companies from all industries can use the data safe to exchange documents with their customers securely and confidentially.

The DSwiss applications are in a constant state of flux and have to face new challenges. Besides continued software development, we are also striving for ongoing technical modernization.

Contact:

If you are interested in applying for this position, please contact us and send us your informative and full application documents by e-mail. We are looking forward to meeting you personally soon.
