

**Straub Medical AG** develops, manufactures and markets hightech-medical devices for the treatment of perfusion disorders. Medical specialists worldwide use our rotational catheters to rapidly restore the patency of occluded blood vessels by a minimally-invasive approach, thus avoiding larger surgical procedures. Our technology contributes to risk-reduction for the patients and to cost-savings for the healthcare system.

**For our R&D-department, we hire for immediate start or as per agreement a**

## **Development Engineer (f/m)**

presenting with a University degree in Engineering, e.g. MSc or Dipl.-Ing. You are experienced in the development of medical devices, ideally endovascular catheter systems. You are familiar with the relevant standards, e.g. ISO 13485, 14971, 62366 and US-requirements. You possess sound expertise in polymers and their processing. You are business fluent in oral and written English and German.

Your task is to develop new medical devices from concept to market launch, to optimize manufacturing by modification or development of new processes and equipment, and to plan, analyze and document tests for verification and validation. Your responsibilities include:

- Lead/work in a cross-functional team in all project phases from technology development to product approval
- Develop, design, and optimize medical devices for vascular intervention, and tools/devices for production and testing
- Develop test system requirements, perform tests of material, components, sub-assemblies, and final product using novel test methods and animal testing
- Provide technical support for the R&D workshop, production areas, and their processes
- Document all activities according to the relevant regulatory and company standards

You are a passionate developer of medical devices? Continuous optimization of products and processes excites you? You are naturally good at finding pragmatic solutions? Then you are a perfect match.

Your place of work is in our modern headquarter in the Swiss high-tech region Sarganserland. High-performance and highly committed employees warrant our leading market position.

**We listen to your ideas.**
